K.L.P.P. PET PACK

Microbial Benefits

ABOUT THE PRODUCT

K.L.P.P. Pet Pack is a biological feed additive designed to maximize digestive efficiency. A horse's beneficial intestinal bacteria can be destroyed or depleted and the pH of their environment can be altered during times of stress. Competition, travel, breeding, treatment with antibiotics, de-wormers and other medications can cause this stress. Stress can also be created by alterations of weather, environment, feed and water.

K.L.P.P. Pet Pack will even assist in managing Colic.

INGREDIENTS:

Lactobacillus Acidophilus Fermentation Product, Saccharomyces Boulardii, Aloe Vera, Chlorophyll Liquid, Peppermint, Ginger, Dandelion, Violet Leaves.

**Research has proven that there are two basic types of micro-organisms.
The majority are beneficial or good bacteria, and the others are pathogenic or bad bacteria.**

THE KEY IS BALANCE

When proper balance is maintained, an animal is healthy, grows at a good rate and converts feedstuffs efficiently. Animals become ill when balance is upset due to stress or other factors. Feed conversion and animal health can decline.

Knowing this balance is important, companies started providing direct-fed microbial (pure cultures).

The purpose was to give high levels of healthy or good bacteria to prevent the bad bacteria from taking over the system. This has led to a numbers contest where producers buy high concentrations of good bacteria. Lactobacillus Acidophilus is one of the most common.

When we examine how these micro-organisms function, we find some interesting points.

Lactobacillus Acidophilus does not attack bad bacteria. It is a Probiotic that competes for space.

Once established, it develops a zone around itself where pathogenic (bad bacteria)

do not grow. This area is called the "zone of inhibition", and it prevents the growth and development of pathogens. K.L.P.P. Pet Pack provides these properties, which is why

K.L.P.P. Pet Pack functions without live organisms.

K.L.P.P. Pet Pack, in final form, is not a source of live organisms.

However, it does supply the by-products they produce. The active ingredients in K.L.P.P. Pet Pack retard the growth of 22 pathogenic organisms. K.L.P.P. Pet Pack provides the benefits obtained from live cultures without the problems and concerns of using pure cultures.

The Digestive Tract First-Aid Kit.....NEVER BE WITHOUT IT!

When to Use K.L.P.P. Pet Pack:

Before and during travel, throughout competitions, with de-wormers, antibiotic therapy, and alterations of feed, water and/or environment: 5 ml(cc) twice daily, orally or with feed.

At Any Sign of Suspicion of Digestive Disorders (including diarrhea):

10 ml (cc) orally, immediately. Thereafter, 5 ml (cc) twice daily until signs of the disorder subside.

Colic: Administer orally, 1 oz (30 ml), immediately, and then contact your local veterinarian

Foals: Administer 5 ml (cc) shortly after birth.

K.L.P.P. Pet Pack comes in 3 sizes. 32 oz bottle, 1 Gallon, and 55 Gallon bulk drum.

KAM's Enzyme PLUS

For all Classes of Horses

Enzymes are protein substances that act as organic catalysts to initiate, accelerate, and control specific chemical reactions in the metabolic process.

They are the essential catalysts for providing energy for all the body's biochemical reactions. Enzymes are found in all living plant and animal matter, as well as, within the body. They are essential for maintaining proper function of the body, such as digesting feed (undigested feed can putrefy in the intestines and feed undesirable micro-organisms, which produce gas and toxins, which can lead to colic and gut permeability). Enzymes are aiding in the repair of tissue and are beneficial when your horse is training.

Enzymes play a role in virtually all body activities, each one having a specific function in the body. The enzymes in the body are actually an invisible activity or energy factor and not just the protein molecule itself.

The reaction promoted by a particular enzyme is very specific. Therefore, because of cellular metabolism includes hundreds of different chemical reactions, there are hundreds of different kinds of enzymes.

When feeding KAM's Enzyme PLUS to your horse you:

- * improve digestion * reduce feed allergy symptoms
- * maintain adequate levels of digestive enzymes * reduce stress on the immune system
- * alleviate gas and bowel toxicity * improve the health of skin
- * reduce malnutrition caused by poor nutrient absorption * prevent future digestive disorders

GUARANTEED ANALYSIS (per gram)

Amylase Aspergillus	2130 DU	Protease Papain (Papaya)	150 HUT
Cellulose Aspergillus	640 CU	Protease Bromelain (Ananas Comosus).....	25 HUT
Maltase Malt Barley.....	60 MU	Lipase Aspergillus.....	400 LU

INGREDIENTS:

Dried Lactobacillus Acidophilus Fermentation Product, Dried Aspergillus Niger Fermentation Soluble, Dried Aspergillus Oryzae Fermentation Soluble, Bacillus Subtilis, Bifidobacterium Bifidum, Lactobacillus Plantarum, Enterococcus Faecium, Whey Protein Concentrate (Bioactive Immunoglobulins).

DIRECTIONS for Horses:

Add 2 scoops (5 g) daily with feed.

Available in:

2 LB JAR, 10 LB BUCKET,
25 LB BAG

To Order Call: 1-519-463-9640 or email: gabrielesutton@aol.com

UF-FORMULA

**Bioactive Immunoglobulins and Prebiotic Factors
For Horses who are Ulcer Prone, Have Ulcers
or Suffer from Poor Digestion**

Many sport horses suffer from stress and poor digestion. Often the optimal acid/alkaline balance of the horses digestive system is disturbed leading to ulcers. Along with intestinal permeability, food sensitivity and Immune Function Response, horses will become ill over time.

UF-Formula offers a botanical solution to prevent and treat ulcers safely and effectively by balancing the acid/alkaline level of the gut/stomach and by soothing and healing Dysbiosis and, therefore, prevent Immune System Dysfunction.

GUARANTEED ANALYSIS

Crude Protein	(min).....	12.00%	Phosphorus (P)	(min).....	0.35%
Crude Fat	(min).....	1.50%	Copper (Cu)	(min).....	10 PPM
Crude Fiber	(max).....	18.00%	Zinc (Zn)	(min).....	40 PPM
Calcium (Ca)	(min).....	0.50%	Vitamin A	(min).....	2000 IU/LB
Calcium (Ca)	(max).....	0.80%			

INGREDIENTS:

Dried Lactobacillus Acidophilus Fermentation Product, Oat Powder, Licorice, Bilberry, Marigold, Meadowsweet, Dried Apple Pectin Pulp, Irish Moss, Marshmallow, Chamomile, Whey Protein Concentrate (Bioactive Immunoglobulins), Maltodextrin, Potassium Iodide.

FEEDING DIRECTIONS: Top Dress 1 Scoop (1/2 Ounce) two times daily.

Note: Store in a cool dry place. Keep lid tightly secured to ensure freshness.

Available in:

1.5 pound container

4.5 pound container

17 pound bulk container
